

ADVANTAGES

- Slide track of anodized aluminum for easy panel servicing and corrosion resistance
- 4" deep track for prefilter or downstream dusting filter
- Dual-access doors with extended surface sponge gasket to assure a proper door-to-filter seal
- Houses up to 3 cubic ft of adsorbent media per each 24" X24" opening and 2000 CFM of system capacity
- Weatherproof, 16-gauge aluminized steel with pre-drilled standing flanges to mate to existing housings or directly to HVAC equipment

Application

Commercial, industrial, manufacturing facilities, medical facilities.
